

Is your business seeking new market opportunities?

Manufacturing waste and other materials such as food waste, packaging and agricultural waste are only a few examples of redundant materials that could potentially open up fresh possibilities for your business.

EBRI's Master Class Course provides exclusive content for entrepreneurs and business leaders covering the technical and commercial fundamentals of bioenergy. Companies looking to develop new products and services can benefit from attending this event, as can those who are simply looking for a better understanding of the bioenergy market.

This course is highly acclaimed by the local business community: 97% of attendees have rated it 'Excellent' or 'Very Good'. To hear more feedback watch our [short video](#) and [business reviews](#)

Our team of world-leading engineers and scientists has designed a tailor-made course to introduce the practical skills, concepts and strategies your business needs to achieve success in the bioenergy sector. By 2020 this sector is expected to generate £12 billion of new market opportunities in the UK supply chain.

Topics covered

- Technologies & Feedstock
- Supply Chains
- Business Models
- Policy & Incentives

West Bromwich: 17-18 October 2018

National Metalforming Centre (NMC Venue), 47 Birmingham Road, West Bromwich, B70 6PY
