

ALS Environmental are proud to announce that they are one of the Silver Sponsors for this years Geotechnica 2016 event. They would like to invite you, their customers, to visit their trade stand at the exhibition. The annual exhibition is taking place at the prestigious Brunel University's Hamilton conference suite, London on Wednesday 6th - Thursday 7th July 2016 and is the UK's largest geotechnical conference and exhibition.

[Click here for more information on Geotechnica.](#)

Geotechnica was developed to bring together all industry sectors from suppliers and contractors through to contractors and clients.

This years event will reflect on the current 'state of the industry', and discuss what is being doing well, lessons learnt from past and ongoing projects, innovations and upcoming technologies. It is an inclusive event and will be used to share knowledge, encourage best practice and help the industry debate, evaluate and establish initiatives to move forward.

At the conference, ALS Environmental will be exhibiting their full range of laboratory solutions, including OnSite Tools that are available through to their soil analysis and soil sampling offering.

Representing ALS Environmental at the event will be Nick Barsby, Mark Aristidou and Talvinder Chohan from the company's business development and operations teams. Their sales and

marketing manager, Nick Barsby, is delighted to be Silver Sponsor at Geotechnica 2016. He said:

"Geotechnica is one of the largest and most established conferences in the market. We are thrilled to be asked to be the Silver Sponsors of the event and take great pride in supporting Geotechnica 2016.

"As well as demonstrating our OnSite Tools, including XRF and UVF, we hope to have some exciting news regarding our Organics testing services to unveil at the event."
