

AHS Ltd is proud to have been granted sole UK wholesale rights to this fantastic product.

Deltalok is the simple, innovative engineering system that delivers a permanent, ecological solution for erosion control; retaining walls; slopes; highways; water applications; living walls; noise barriers and much more.

Deltalok requires little or no specialist tools or labour and offers a cost-effective and instant solution to a wide range of applications.

Mike Johnson, Deltalok specialist at AHS Ltd, said: "Since launching this product this month, we've received much interest, as customers seek a cost-effective and green solution to a number of engineering, construction and landscaping projects.

Initial enquiries and sales prove that there is a real demand for such a product in the engineering, construction and landscaping sectors and we're very pleased to be leading the way in being the only wholesaler of Deltalok in the UK."

Deltalok delivers the structural strength of concrete whilst blending entirely sympathetically with the natural landscape.

"We've received very positive feedback from the customers and contractors of the first Deltalok project we supplied and we look forward to hearing from many more happy customers as further

projects are completed."
