

Solarwall a long established local energy efficiency company, are now part of the E N Procure Elemental Works Framework meaning that Solarwall can now install Cavity Wall Insulation, Solar Thermal and Solar Photovoltaic Panels and Air Source Heat Pumps for Efficiency North.

The framework, which has an estimated £325m demand for the sub region of East, has been developed by Efficiency North, a consortium of social housing providers in Yorkshire and the Humber to help service the local area effectively and efficiently using both National and Local companies.

Solarwall, through the Framework will provide works, materials and services which can be accessed by any public sector body and principally by Social Landlords. As part of this framework, Solarwall will help the consortium to lower carbon levels and save tenants and homeowners money on their fuel bills through the installation of Cavity Wall Insulation, Solar Thermal & Solar Photovoltaic Panels & Air Source Heat Pumps.

Sue Lamb, Managing Director of Solarwall said “Solarwall are proud to be part of the E N Procure Elemental Works Framework. This is a great opportunity for Solarwall to help Efficiency North reach their social and economical targets throughout the local community.”

Solarwall is a long-established home energy company based in York and servicing Yorkshire, Humberside, Lincolnshire and the North East. Solarwall of York provides cost effective energy saving solutions to reduce fuel bills, combat climate change and make homes warmer.

Since the company was founded over 33 years ago they have saved the local area over 1.5 million tonnes of CO². They have a commitment to quality and reliability and offer guarantees on all the work they carry out.
