

Accelerated Technology Laboratories, Inc. (USA), a premier supplier of Laboratory Data Management Solutions, will again be exhibiting in booth #105 at the Water Quality Technology Conference, November 4– 8, 2012, at the Sheraton Centre Toronto Hotel in Toronto, Ontario, Canada.

Accelerated Technology Laboratories (ATL) will be featuring their revolutionary Laboratory Enterprise Resource Planning (ERP) system, TITAN, which represents the next generation in Laboratory Information Management Solutions. TITAN leverages two decades of laboratory informatics expertise to define the new standard, offering a feature-rich user experience that simplifies and promotes automation and productivity through streamlined work processes.

Utilising Microsoft ClickOnce deployment for easy installation and upgrading, TITAN is highly configurable and provides users the ability to tailor LIMS business rules to match their organisations' requirements, rather than modifying their way of doing business to fit a software package. ATL will also be exhibiting the iMobile for field data collection and the secure web portal Result Point.

In addition, ATL will be exhibiting its flagship product Sample Master Pro v9 LIMS, which boasts a brand new look and feel, complete with new icons and ribbons, providing users a better interface and richer experience. There are 10 feature rich modules from Sample Tracking, 1D and 2D barcode support, Data Entry, Sample Scheduling, QA/QC, Electronic Data Transfer, Chemical Inventory, Resource Management, Time Tracking , CRM and Maintenance.

ATL will be hosting a user dinner meeting during the show to highlight new product features, to interact with colleagues, exchange information on how clients have leveraged ATL's automation solutions have addressed laboratory challenges and discuss best practices.
