

Rainmaker LLC., U.S. is pleased to announce its representation of Terragon Environmental Technologies, Inc. Terragon's revolutionary waste elimination technology, MAGS, transforms solid and oily waste into safe bio-char, thermal energy, and syngas, which it uses to fuel the system. This makes it one of the world's most environmentally friendly appliances. Such innovative technology provides superior waste management for today's marine and offshore environment.

The mission of Rainmaker LLC is to provide business opportunities through clear and concise communication between their principals and clients, to reach finalized agreements that are exceedingly beneficial to all concerned. The provide services that include: worldwide dry docks, topside repairs, project management, engineering, and innovative environmental solutions.
