

Tackling global pandemics, protecting precious biodiversity, and making medical breakthroughs all rely on scientific excellence. If you're ready to rise to the challenge, start your journey with a research-enriched, industry-focused degree at the University of Salford.

Now more than ever we need switched-on students, driven by environmental concern and passionate about science, to advance our understanding of the world. As pioneers of scientific knowledge and research, Salford is already making a huge contribution. By choosing one of our practical and relevant degree courses, you can be part of our journey too.

Undergraduate Courses

Across our range of rewarding and immersive science and environment-based courses, we focus on real-world issues. Each course is designed to deliver deep theoretical knowledge and a practical skillset, where you can get hands-on in our world-class Bodmer labs, out in the field, or on placement.
